

**FOR IMMEDIATE RELEASE**

**Rosen Technology Resources, Inc. Announces the Following Law Firms have Applied Polaris Near Duplicate Software for their Clients:  
Caldwell Leslie & Proctor, Hinkhouse Williams Walsh and Miller Chevalier**

**Chicago, IL – 4/12/10** — Rosen Technology Resources, an award-winning litigation support consulting and software company, is pleased to announce that the following law firms have applied Polaris near-duplicate software: Caldwell Leslie & Proctor in Los Angeles, CA, Hinkhouse Williams Walsh in Chicago, IL and Miller Chevalier in Washington, DC. Polaris is a tool which identifies, groups, and provides a review order for near-duplicate documents, according to similarity thresholds established by a user.

Polaris looks at the content, not format, of documents to determine similarity. In addition to providing the standard grouping and best representative data which is typical of near-duplicate analysis, Polaris provides data which reveals relationships beyond those available from traditional near-duping applications, resulting in saved time and cost during the document review process.

Polaris was created to reduce the cost of litigation document discovery and review, as well as decrease the amount of time spent on review. As the size and scope of document collections grow, so does the cost and time associated with those collections. Polaris provides a solution that will decrease the costs associated with electronic discovery, while also decreasing the amount of time reviewing duplicate documents.

Lisa Rosen, President of Rosen Technology Resources, said, "We are incredibly excited to have service providers and law firms using Polaris, as it truly is the next waypoint in the evolution of near-duplicate technology. Due to the nature of today's document collections, near-duplicate technology has become a recognized need. However, most firms do not invest in the technology because of the high cost of implementation. Polaris is a cost-controlled solution that should be leveraged on all cases, and frankly creates a cost and time savings by streamlining the review process."

For additional information about Polaris™, call Rosen Technology Resources, Inc. at 312-251-4440 or email [sales@rosentech.net](mailto:sales@rosentech.net) to request an online demonstration.

**About Rosen Technology Resources**

RTR provides award-winning litigation support solutions in the form of case management, data processing, database management, litigation support, litigation software training, and software sales.
